

Perpetual Energy Inc. has an immediate opening in their Exploration & Development team for a Production Engineer. This position is in the Calgary office and will require some intermittent field work.

Key Accountabilities

- **Monitor and optimize** heavy oil and shallow gas **production, operation costs, and netbacks** in collaboration with reservoir engineering and operations, with a particular focus on heavy oil waterflood performance.
- Lead **well servicing decisions** such as pump changes based on economic netbacks.
- Identify, recommend, and program well **workovers, recompletions, and wells tests**.
- Lead area production and operating cost **accruals, forecasting, and budgeting**, and reconcile variances.
- Collaborate with the facilities, development, and operations staff on **capital projects** such as equipping and tie in new wells, waterflood infrastructure, and projects designed to optimize operating costs.
- Make necessary **regulatory applications** and ensure compliance.
- Create and maintain a **full life cycle plan** for shallow gas wells.
- Support the annual **reserves process** as needed.
- Undertake **special projects** focused on enhancing area netbacks.
- Be the **main contact** for the field, completions, and facility groups.

Education and Experience

The education and experience required for the role of the Production Engineer are as follows:

- B.Sc. in Engineering;
- 3-5 years experience; and
- Production, field, completion, or facility experience would be an asset.

Skills and Abilities

The skills and abilities required for the Production Engineer role include, but are not limited to, the following:

- Exceptional **organizational, communication and interpersonal** skills.
- Demonstrate ability to work effectively and cooperatively in a **fast-paced team environment**.
- High level of **business acumen** in making recommendations and decisions.
- Professional presentation, written and verbal **communication skills**.
- **Results oriented and hardworking**, able to meet required deadlines in a dynamic environment.
